Aim and Scope:

1- Reasons for publication of Crescent Journal of Medical and Biological Sciences

A large amount of periodicals, having great contributions Medical and Biological sciences, in basic and medical clinical sciences, mainly including science and illuminating the results of valuable studies on medical sciences has being published in world since a long period of time.

The scientific research becomes valuable when it contributes and promotes our knowledge, and its results are used by other investigators, i.e. when it is cited and included into the international citation indexes.

2- Aim

Reasons for joining of **Crescent Journal of Medical and Biological Sciences** (E-ISSN: 2148-9696) into the above mentioned fields could not be easily denied by investigators. The aim of the journal is not only to be a good journal but is to publish such a journal that could be accepted as a good periodical by international judies, that revised our papers published in international journals, **presented** at international meetings and thus to reach international levels. If we will not plan sufficiently high goals, the power, respect and breath of this journal will show so low performance. The goal should be as sacred as the greatness of the aim. The main aim is to keep a balance between the number of published and cited papers. It is necessary to start with joining Iranian index and to familiarize it with Iranian medical scientists. At the same time to get a considerable place among **international** periodicals on medical and biological sciences.

This journal is an open access, peer-reviewed scientific research journal that provides rapid publication of articles in all fields of medical and biological science on the basis of its originality, importance, interdisciplinary interest, timeliness, accessibility, elegance and surprising conclusions. Hence, it offers an exceptionally fast publication schedule including prompt peer-review by the experts in the field and immediate publication upon acceptance. The editorial boards' aims at reviewing the submitted articles as fast as possible and promptly include them in the forthcoming issues. Crescent Journal of Medical and Biological Sciences is published 4 times per year on January, April, July, October in each seasons first month and its publication language is English. This journal is licensed under a Creative Commons Attribution License 4.0 (CC-BY). CJMB supports the Open Access initiative. Abstracts and full texts (PDF format) of all articles published by cjmb are freely accessible to everyone immediately upon publication. This journal is licensed under a Creative Commons Attribution License. We are member of the ICMJE and follow the Uniform Requirements for Manuscripts Submitted to Biomedical Journals, issued by International Committee for Medical Journal Editors (ICMJE), as well as theCommittee on Publication Ethics (COPE) code of conduct for editors.

3- Content of the journal

All kind of knowledge contributing to the development of science by its content, value, level and originality will be comprised Crescent Journal of Medical and Biological Sciences. Problems of public health and their solutions are at the head of the windows opening us to the world .

The journal by its content should assist in communication of physicians and researchers. All questions concerning scientific level, though more administrative, problems as staff queries, intentions and decisions of the Ministry of Public Health should be opened to discussion in narrow frame.

Post and pre-graduate education should get out of ranges of tool-equipment promotion of firms and take valuable place in the content of the journal. The considerable part should be constituted in way of summary of post-graduate courses and works evaluating developments in medical education. The " **Crescent Journal of Medical and Biological Sciences**" is a modern forum for scientific communication. Data and information, useful to investigators in any discipline in medical and biological sciences, in basic and medical clinical sciences. Will be published after they have been peer reviewed. This will also include reviews and multidisciplinary research.

4- Functioning of the Journal

The first issue of the journal will be released in Winter 2014, probably in January. If one will examine attentively the aim of the journal it could be thought to be hasty.

The more information is available in The Peer-Review System, Policy and Confidentiality page (http://www.cjmb.org/Policies) and Instruction to author's page (http://www.cjmb.org/ForAuthors).

- **Quality, reputation and high standard of peer review**

This journal has a high standard of peer review.Strong Editorial Boards who help with policy and decision-making and in some cases help with choosing referees and reviewing manuscripts.

- **Open access:**

All research articles published in **Crescent Journal of Medical and Biological Sciences** are open access and immediately accessible online to the entire global research community. They are available via the journal Archive as well as major archives and repository such as indexed databases.

- **User license:**

Users or readers of your article also need to be clear on how they can use the article. Our policy for gold open access articles is detailed below.

- **Creative Commons Attribution 4.0 (CC-BY):**

  Allows users to copy, to create extracts, abstracts and new works from the Article, to alter and revise the Article, and to make commercial use of the Article (including reuse and/or resale of the Article by commercial entities), provided the user gives appropriate credit (with a link to the formal publication through the relevant DOI), provides a link to the license, indicates if changes were made and the licensor is not represented as endorsing the use made of the work.

- **Rapid publication:**

  Online submission, electronic peer review and production make the process of publishing your article simple and efficient.

5- The secretariat of the journal

The editorial mission of **Crescent Journal of Medical and Biological Sciences** is undertaken by Prof. Dr. Arash Khaki Member of the Women's Reproductive Health Research Center of Tabriz University of Medical Sciences, Iran (http://wrhrc-en.tbzmed.ac.ir/). The publishing of the journal is undertaken by (Encino, CA ,office : Aras Part Medical international Press ,USA).

Author Guidelines

1. **A. General Policy :**

Crescent Journal of Medical and Biological Sciences (E ISSN: 2148-9696). This Journal has approved by Iranian Ministry of Health & Medical Education Journals Commission http://journals.research.ac.ir/ and Published by Aras Part Medical international Press.

This journal is an open access, peer-reviewed scientific research journal that provides rapid publication of articles in all fields of medical and biological science on the basis of its originality, importance, interdisciplinary interest, timeliness, accessibility, elegance and surprising conclusions. Hence, it offers an exceptionally fast publication schedule including prompt peer-review by the experts in the field and immediate publication upon acceptance. The editorial boards' aims at reviewing the submitted articles as fast as possible and promptly include them in the forthcoming issues. Crescent Journal of Medical and Biological Sciences is published 4 times per year on January, April, July, October in each seasons first month and its publication language is English. This journal is licensed under a Creative Commons Attribution License 4.0 (CC-BY),

Manuscripts, or the essence of their content, must be previously unpublished and should not be under simultaneous consideration by another Journal. The authors should also declare if any similar work has been submitted to or published by another Journal. By virtue of the submitted manuscript, the corresponding author acknowledges that all the co-authors have seen and approved the final version of the manuscript. The corresponding author should provide all co-authors with information regarding the manuscript, and obtain their approval before submitting any revisions. Manuscripts are only accepted for publication on the understanding that the authors will permit editorial amendments, though proofs will always be submitted to the corresponding author before being sent finally to press. Prior to the initial submission of a new manuscript, please carefully consider that all authors' names are included as no change to authors' details will be permitted after the acceptance. The decision to accept a contribution rests with the Editorial Board of the ***Crescent Journal of Medical and Biological Sciences***.

Manuscripts will be considered for publication in the form of original articles, Case report, short communications, Letter to editor and review articles. The work should be original or a thorough by an authoritative person in a pertinent field.

B. Manuscript Preparation:

Manuscripts should be prepared in accordance with the "Uniform Requirements for Manuscripts Submission to Biomedical Journals" proclaimed by the International Committee of Medical Journal Editors (http://www.icmje.org/)

1. **Cover letter**

a -A statement that the manuscript has been read and approved by all the authors.

b -That the requirements for authorship have been met for all the authors, based on the criteria stated by *ICMJE.*
c -Approval of all the authors regarding the order in which their names have appeared.

d - That each author confirms the manuscript represents honest work.

e - The name, address, and telephone number of the corresponding author who is responsible for communicating with other authors about revisions and final approval.

f - The letter should give any additional information that may be helpful to the editor, such as the type or format of the article. If the manuscript has been submitted previously to another journal or in another language, it is helpful to include the previous editor's and reviewers' comments with the submitted manuscript, along with the authors' responses to those comments. Submitting previous evaluatory review of another journal accelerates the review process.

g - For accepted manuscripts, the authors are requested to fill and sign the journal's cover letter to express their consent for its publication.

h - To reproduce published material, to use illustrations or tables or report information about identifiable people, the author should submit a copy of the permission with the manuscript to the journal.

2. **Top Ethic Committee Approval**

Inclusion of the approval letter from the relevant Ethics Committee or Institution's Review Board regarding the research protocol and the rights of the subjects (if applicable to the study)

3. **Top Consent Form**

Attach a copy of the consent form to the letter, if applicable. Consent forms would be evaluated by the Ethics Committee and then signed by the participant.

4. **Top RCT or NCT Registration**

Emailing the letter denoting registration of RCTs or NCTs in domestic or international databases (The trial's registration number needs to be mentioned, too).

5. Manuscripts submitted in English, must be type written, double-spaced, on good quality A4 paper, or paper of similar format. Authors are requested to reserve margins of at least 2.5cm all around the paper. Original drawings of photos, tables and figures should be furnished together with the manuscripts.

6. Manuscripts should be kept to a minimum length and should be subdivided into labeled sections (Title page, Abstract, Keywords, Introduction, Materials and Methods, Results, Discussion, Conclusion, Acknowledgement, and References).

7. A title page is to be provided and should include the title of the article, authors' names with full first name (with degrees), authors' affiliation, suggested running title and corresponding author. The affiliation should comprise the department, institution (usually university or company), city and state (or nation). The suggested running title should be less than 50 characters (including spaces) and should comprise the article title or an abbreviated version thereof. For office purposes, the title page should include the name and complete mailing address, telephone and fax number, and email of the one author designated to review proofs.

8. An abstract no longer than 250 words for reviews and research articles is to be provided as the second page. Abstract should be structured as objective(s) (including purpose setting), materials and methods, results, and conclusion.

9. A list of 3-8 keywords, chosen from the Medical Subject Headings(MeSH) listhttp://www.nlm.nih.gov/mesh/MBrowser.html, is to be provided directly below the abstract. Keywords should express the precise content of the manuscript, as they are used for indexing purposes. Provide abbreviations and nomenclature list in an alphabetical order and non-standard abbreviations contained in the manuscript (excluding references) with definitions after the keywords. Use abbreviations sparingly and only when necessary to save space, and to avoid repeating long chemical names or therapeutic regimes. In a figure or table, define the abbreviations used in a footnote.

10. Tables in limited numbers should be self- explanatory, clearly arranged, and supplemental to the text. The captions should be placed above.

11. Figures should be utilized only if they augment understandability of the text. The captions should be placed below. Drawings and graphs should be professionally prepared in deep black and submitted as glossy, black and white clean Photostats. Professionally designed computer generated graphs with a minimum of 300 DPI laser printer output is preferable. Color photographs are welcomed.

12. The same data should not be presented in tables, figures and text, simultaneously.

13. References in limited numbers and up-to-dated must be numbered consecutively in order of citation in the text (number in parentheses). Periodical titles should be abbreviated according to the PubMed Journals Database (http://www.ncbi.nlm.nih.gov/entrez/query.fcgi?db=journals). Print surnames and initials of all authors when there are six or less. In the case of seven or more authors, the names of the first six authors followed by et al. should be listed.

Please Put Your Article References in Crescent Journal of Medical and Biological Sciences **EndNote System Before Submitting.**

TYPE OF ARTICLES:

Type of articles are based on PubMed defenitions. For more info please refer to:http://dtd.nlm.nih.gov/publishing/tag-library/3.0/n-w2d0.html

Editorial :

Editorial is Opinion piece, policy statement, or general commentary, typically written by staff of the publication (The similar value “article-commentary” is reserved for a commentary on a specific article or articles, which is written by an author with a contrasting position, not an editor or other publication staff.)

Letters to the Editor about a recent journal article :

Letters referring to a recent article in this journal must be received within three months of its publication. For example, a letter referring to an article published in the January issue must be submitted online no later than March 31st. Letters submitted after the allowed time will not be considered.

The text, not including references, must not exceed 700 words. A maximum of three authors and 10 references are allowed. Neither tables nor figures are allowed.

Letters to the Editor NOT referring to a recent journal article :

Original research that is of interest but does not fulfill all the requirements needed for publication as a full-length manuscript can be submitted as a letter to the editor. The letter must have a title and a maximum of three authors.

The text, not including references, tables, figures or legends must not exceed 700 words. No more than 10 references and either one table or one figure are allowed.

Word Count Limit: Letters should contain 500 - 700 words, maximum number of references is 10, maximum Number of illustrations/Tables is 1.

Original :

The content of the paper must justify its length. For reports of original investigative work, traditional division into sections is required: Title, Keywords, Addresses and which author address for correspondence, Structured abstract, Background, Objectives, Materials/Patients and Methods, Results, Discussion, References and Acknowledgements, Legends for display items (Figures and Tables).

Research articles should contain 2500 - 3500 words, maximum number of references is 55, maximum Number of illustrations/Tables is 5.

Review Article :

Review Articles should contain 3500 - 4000 words, maximum number of references is 80, maximum number of illustrations/Tables is 5. In a review article both abstract and text of the manuscript, include following items:

1) Context: Include 1 or 2 sentences describing the clinical question or issue and its importance in clinical practice or public heath.

2) Evidence Acquisition: Describe the data sources used, including the search strategies, years searched, and other sources of material, such as subsequent reference searches of retrieved articles. Explain the methods used for quality assessment and the inclusion of identified articles.

3) Results: Address the major findings of the review of the clinical issue or topic in an evidence-based, objective, and balanced fashion, emphasizing the highest-quality evidence available.

4) Conclusions: Clearly state the conclusions to answer the questions posed if applicable, basing the conclusions on available evidence, and emphasize how clinicians should apply current knowledge.

CASE REPORT:

A case report is a case study, case report, or other description of a case that should contain 1500 - 2000 words with a structured abstract of 200 words maximum. Case reports should comprise sections of Introduction, Case Presentation, and Conclusions in Abstract and Introduction, Case Presentation, and Discussion in full text with not more than 2 tables or figures and up to 20 references.

Brief Report :

Brief Reports should contain 1000 - 2000 words with a structured abstract of 200 words maximum. Short reports should comprise sections of Background, Objectives, Materials & Methods, Results and Discussion with not more than 2 tables or figures and up to 20 references.

Short Communication:

Short Communication, follow the instructions for original articles, except that the total word number of the main text (excluding references, tables and figure legends) is limited to 2000 with no more than 2 figures and/or tables and no more than 15 references. An abstract, not exceeding 150 words, should be presented at the beginning of the article.

News :

News should contain 1000 - 2000 words with a structured abstract of 200 words maximum. News should comprise sections of Background, Objectives, Materials & Methods, Results and Discussion with not more than 2 tables or figures and up to 20 references.

Submission and Review Process :

Manuscripts must be written in English (use consistently either British or American spelling) and must be submitted online. To submit, go to http://www.cjmb.org/Login .Full instructions for submission are detailed on this website.

C. General Consideration:

1. **Peer review process:** All submissions will be reviewed anonymously by at least three independent referees. All manuscripts will be acknowledged upon presenting to the Journal office, provided that all stated requirements are met. Authors are encouraged to suggest names of three expert reviewers, but selection remains a prerogative of the Editor. The whole review process depends on receiving referees comments and revising the manuscripts based on these comments to the author. On receipt of the revised article from the author, and after final approving by referees, the letter of acceptance is issued to the author. Authors have the right to communicate to

the editor if they do not wish their manuscript to be reviewed by a particular reviewer because of potential conflicts of interest. No article is rejected unless negative comments are received from at least two reviewers.

2. **Conflicts of interest:** Authors should disclose, at the time of submission, information on financial conflicts of interest or other interests that may influence the manuscript. Authors should declare sources of funding for the work undertaken.

3. **The Journal's Policy on Plagiarism:** Any practice of plagiarism will not be tolerated by the journal regarding submitted manuscripts. Non-identifiable quoted segments of articles or close paraphrases from other author/s or even submitting the author's previously published work are known as the act of plagiarism by this journal unless proper use of quotations or paraphrasing with decent citation or referencing are in place. Heavy use of one or a couple of articles is discouraged, even if paraphrased fully. Advertent practice of plagiarism will abort reviewing process or later submission to this journal. All submitted articles will evaluate by ***iThenticate*** software belonged to cross check for stop any plagiarism and improve publication quality.

4. **Ethical consent:** All submitted articles involving human experiments should be performed only in accordance with the ethical standards provided by the responsible committee of the institution and in accordance with the Declaration of Helsinki (as revised in Edinburgh 2000),available at http://www.wma.net/en/30publications/10policies/b3/index.html. Papers describing animal experiments can be accepted for publication only if the experiment conforms the National Institute of Health Guide (National Institute of Health Publications No. 80–23, Revised 1978) for the care and use of Laboratory Animals for experimental procedure. Authors must provide a full description of their anesthetics and surgical procedures. All manuscripts reporting the results of experimental investigations involving human subjects should include a statement confirming the informed consent was obtained from each subject or subject's guardian. All animal or human studies should be used after approval of the experimental protocol by a local ethics committee

5. **Acknowledgements:**

Contributors: In acknowledgement section, name people for their contributions or their permission to reproduce their published material, to use their illustrations or provide information about them-try to fully name people who have helped from the conception of the idea to adoption of the hypothesis, to finalization of the study, etc., earnestly.Statement of financial support: Aside from the title page, state any financial or other relationships that might lead to a conflict of interest.

6. **Copyright:** In accepted time all author should resend copyright form of CJMB journal that will send them by journal email.

7. **Disposal of material:** Once published, all copies of the manuscript, correspondence and artwork will be held for 6 months before disposal.

8. **Open access license policy**

We are continuously working with our authors to provide the best range and choice of user license options which define how readers can reuse open access articles published.There are two distinct types of licenses which need to be defined during the open access publication process:

- **Author agreement:**

  In order for us to do our job of publishing and disseminating your research article we need publishing rights. For open access articles we use an exclusive licensing agreement in which authors retain copyright in their article. (copyright).

- **User license:**

  Users or readers of your article also need to be clear on how they can use the article. Our policy for gold open access articles is detailed below.

  Creative Commons Attribution 4.0 (CC-BY) :

  Allows users to copy, to create extracts, abstracts and new works from the Article, to alter and revise the Article, and to make commercial use of the Article (including reuse and/or resale of the Article by commercial entities), provided the user gives appropriate credit (with a link to the formal publication through the relevant DOI), provides a link to the license, indicates if changes were made and the licensor is not represented as endorsing the use made of the work.

9.Once a manuscript is accepted for publication it will be provided with a registered DOI number following the acceptance decision. Manuscripts accepted for publication by the **Crescent Journal of Medical and Biological Sciences** will be published as ahead of print articles prior to the printing date of their scheduled issue. Corresponding author will be provided with a PDF Proof by the publisher once the production process of an accepted manuscript is over.

10.Why dose Crescent Journal of Medical and Biological Sciences has article-processing charges :

Open access publishing is not without costs. CJMB defrays these costs through article-processing charges because it does not have subscription charges for its research content. This journal instead believes that immediate, worldwide, barrier-free, open access to the full text of research articles is in the best interests of the scientific community.

11. Article-processing charges pay for:

- Immediate, worldwide open access to the full article text
- Developing and maintaining electronic tools for peer review and publication
- Preparation in various formats for online publication
- Securing inclusion in scientific databases as soon as possible after publication
- Securing inclusion in CrossRef, enabling electronic citation in other journals that are available electronically
- Checking article by Cross check software.

12. **Publication Fee:**

This journal does not charge any article in submission time, but in time of article acceptance after peer review process, A non-refundable charge of (250 USD) for each accepted manuscript must be paid by the author(s) to Crescent Journal of Medical and Biological Sciences by PayPal method, invoice will send for each accepted manuscript to correspondences author.

Focus and Scope

Crescent journal of medical and biological sciences,(E ISSN:2148-9696) is an open access, peer-reviewed scientific research journal that provides rapid publication of articles in all fields of medical and biological science on the basis of its originality, importance, interdisciplinary interest, timeliness, accessibility, elegance and surprising conclusions. Hence, it offers an exceptionally fast publication schedule including prompt peer-review by the experts in the field and immediate publication upon acceptance. The editorial boards' aims at reviewing the submitted articles as fast as possible and promptly include them in the forthcoming issues.

This Journal has approved by Iranian Ministry of Health & Medical Education Journals Commission http://journals.research.ac.ir/ and Published by Aras Part Medical international Press . CJMB supports the Open Access initiative. Abstracts and full texts (PDF format) of all articles published by CJMB are freely accessible to everyone immediately upon publication.

This journal is licensed under a Creative Commons Attribution License. We are follow of the ICMJE and the Uniform Requirements for Manuscripts Submitted to Biomedical Journals, issued by International Committee for Medical Journal Editors (ICMJE), as well as the Committee on Publication Ethics (COPE) code of conduct for editors.

Peer Review Process

Cjmb accepts manuscripts report novel findings, which could result in impacts on in all fields of medicine and biological sciences, originality, importance, interdisciplinary interest, timeliness, accessibility, elegance and surprising conclusions. Hence, it offers an exceptionally fast publication schedule including prompt peer-review by the experts in the field and immediate publication upon acceptance. Quality and topic of submitted manuscript beside the priority of research field are the least considered criteria in each manuscript before entering in formal review process. Any type of submissions containing scientific information necessitates review process to ensure content quality.

Technical editor checks the format and style of manuscript prior to review process to assure its compatibility with *CJMB* guidelines for authors. Checking compatibility continues in whole of the review process and publication. In cases when the authors have not considered the guidelines, the manuscript will be sent back to the authors for compatibility. Each submitted manuscript will be considered by the editor-in-chief or one of associate editors in the editorial board. If it meets the minimum criteria to be included in review process, one of the editors (topic expert) selects at least two external reviewers for detailed evaluation process. Selection of reviewers is based on their scientific background and experience, previous works, authors' suggestion, and expertise. Reviewers promise to undertake the confidentiality of materials previous to ePublication. In the review process of *CJMB*, reviewers stay anonymous. Also, authors could suggest reviewers for their manuscript.

Managing editor receives the reviewers' comments and sends them along with decision letter to corresponding author. Final decision on each manuscript will be made by the assigned editor of the manuscript. As *CJMB* is a rapid response journal, so this process takes not more than three weeks. Decision letter determines the status of manuscript in five ways:

1. **Acceptance:** The manuscript could be ePublished. This process lasts two weeks. Before ePublication, corresponding author could verify a proof copy of the paper. After ePublication, paper will be in a queue to be published in one of *CJMB* upcoming issues.

2. **Minor revision:** Authors will receive comments upon their manuscript, at which point the authors will be asked to submit a revised copy beside cover letter showing authors' rejoinders, and also a marked copy utilizing Track Changes in Review menu of Microsoft Word Documents. Revised manuscript should be submitted in one month after decision letter. Unless, authors need to go through a resubmission process.

3. **Major revision:** It means a chance to reorganize the manuscript to meet the required scientific criteria for another review process. Authors should pay more attention to reviewers' comments and focus on their highlighted points. Editor may/may not request the authors to resubmit their revised manuscript beside cover letter and a marked copy. Revised manuscript should be submitted in one month after decision letter. Otherwise, authors need to go through a resubmission process.

4. **Rejection:** In most cases, methodological and scientific concerns are the main origins of rejection. Causes of rejection will be sent to the authors to provide more chance for them for publication in other journals.

5. **Withdraw:** if the manuscript does not meet the scopes of *CJMB*, it will be withdrawn with suggestion to be sent to another journal.

CJMB may invite prominent experts to submit editorials or review papers in special topics, which will be reviewed by editors only. Also, commentaries may pass the same way in review process. In cases that concerns arise during review process about statistical test, methodology or techniques applied in research, editor may request independent internal/external experts to comment before final decisions. As the final point, we strongly suggest authors to observe research and publication ethics in their manuscript, as reporting of any unethical issue during steps of review may lead to the rejection of the work by *CJMB*. Also, the authors should consider that they are in the charge of all materials (scientific and ethical) that they provide in their articles.

All of editors and reviewers of *CJMB* do their utmost to keep the quality of disseminated scientific works to ensure the solid impact of papers on biomedical fields. In *CJMB*, the review process lasts maximum two month.

Open Access Policy

This journal provides immediate open access to its content on the principle that making research freely available to the public supports a greater global exchange of knowledge.

The Peer-Review System, Policy and Confidentiality

An essential part of any publication process is the peer-review process. In this process the reviewers not only give their scientific view on an article, but also recommend points for improving the quality of the article. In this way the submitted articles are refined to such an extent that are published as a logical and scientifically approved article in a journal. As a general view; it is the responsibility of the journals to offer an effective peer-review system. The aims of the CJMB for peer-reviewing are of high standard and quality. Peer-review process selects papers of significant scientific interest. our journal expects referees to not only confirm the novelty of a manuscript but also to identify the bad features and mistakes. In addition, reviewers are encouraged to suggest points for improving the submitted article.Detection of fraud and plagiarism is of utmost significance to the editors of CJMB. However, the editors do not expect reviewers to identify carefully hidden ideas and intentions of deceptions in a submitted manuscript. Whenever needed the submitted manuscripts are written once again. Through a team work the submitted manuscript is not only evaluated scientifically, its grammar, language and literature are also assessed. The goal of the CJMB is to publish a well written, scientifically approved manuscript which is of value for the scientific community and society.

As a peer-review policy, all reviewers are requested to keep the submitted manuscripts and any associated data confidential. However if a reviewer seeks advice while assessing a manuscript, he/she must ensure that confidentiality is maintained and that the names of any such colleagues must be provided to the journal as soon as possible. CJMB makes its utmost effort to keep the content of all submitted manuscripts confidential until they are published. Although the aim of the journal is to maintain referees' confidentiality in regard to the submitted article, it is not responsible for the conduct of reviewers.Peer review is defined as obtaining advise on individual manuscripts from reviewers experts in the field who are not part of the CJMB editorial staff.

CJMB accepts manuscripts report novel findings, which could result in impacts on in all fields of medical and biological science based on its originality, importance, interdisciplinary interest, timeliness, accessibility, elegance and surprising conclusions. Hence, it offers an exceptionally fast publication schedule including prompt peer-review by the experts in the field and immediate publication upon acceptance. Quality and topic of submitted manuscript beside the priority of research field are the least considered criteria in each manuscript before entering in formal review process. Any type of submissions containing scientific information necessitates review process to ensure content quality.

Editorial Review and Publication

1- CJMB's authors will be sent notifications/Code of the manuscript's receipt and editorial decisions by email. During the peer-reviewing process, authors can check the status of their manuscript via the Online Manuscript Submission System.

2- All submissions to the CJMB go through a double-blind peer-review process to ensure content quality. At the first stage, a technical editor checks format and style of manuscript to assure its compatibility with the CJMB guide for authors. If authors have not considered the guides, the manuscript will be sent back to authors for compatibility.

3- The manuscript will be then assigned to section editors and bio-statistician editors based on the subject area and editor-in-chief decision, for a fast pre-review screening within 2 week. Section editors check the manuscript for content quality (with a focus on methodology, originality,statically and contribution to knowledge and practice) and use of English,for prohibit of plagiarism and improve language quality article will evaluate by iThenticate belonged to Cross check as CJMB is a member of cross check.

The decision at this stage is fast reject, revise and re-submit, or assign to external reviewers for detailed evaluation process. Selection of external reviewers is based on their scientific background and experience, previous works, authors' suggestion, and expertise.

4- Every attempt is made at the CJMB to obtain at least 2-3 strong reviews on each manuscript.

5- Editor-in-Chief receives the reviewers' comments and sends them along with decision letter to corresponding author.

CJMB adheres to a double-blind peer-review process that is rapid, fair, and ensures the high quality of published articles. CJMB reviewers are required to declare their conflict of interests and maintain the confidentiality about the manuscripts they review.

As CJMB is a rapid response journal, the review process takes between 2 to 5 months.

Managing editor receives the reviewers' comments and sends them along with decision letter to corresponding author. Final decision on each manuscript will be made by the assigned editor of the manuscript. As CJMB is a rapid response journal, so this process takes not more than three weeks. Decision letter determines the status of manuscript in five ways:

1. Acceptance: The manuscript could be ePublished. This process lasts two weeks. Before ePublication, corresponding author could verify a proof copy of the paper. After ePublication, paper will be in a queue to be published in one of CJMB upcoming issues.

2. Minor revision: Authors will receive comments upon their manuscript, at which point the authors will be asked to submit a revised copy beside cover letter showing authors' rejoinders, and also a marked copy utilizing Track Changes in Review menu of Microsoft Word Documents. Revised manuscript should be submitted in one month after decision letter. Unless, authors need to go through a re submission process.

3. Major revision: It means a chance to reorganize the manuscript to meet the required scientific criteria for another review process. Authors should pay more attention to reviewers' comments and focus on their highlighted points. Editor may/may not request the authors to resubmit their revised manuscript beside cover letter and a marked copy. Revised manuscript should be submitted in one month after decision letter. Otherwise, authors need to go through a re submission process.

4. Rejection: In most cases, methodological and scientific concerns are the main origins of rejection. Causes of rejection will be sent to the authors to provide more chance for them for publication in other journals.

5. Withdraw: if the manuscript does not meet the scopes of CJMB , it will be withdrawn with suggestion to be sent to another journal.

Editing

Accepted manuscripts will be edited according to the CJMB Guide for Authors (this does not include language editing) and returned to the corresponding author for final approval. All

contributing authors are responsible for all statements made in their manuscript during editing and production that are authorized by the corresponding author.

Corrections

Requests for publishing corrections should be sent to the editorial office. Corrections will be reviewed by editors and are published immediately.

Proofs:

The corresponding author will receive an e-mail alert containing a link to a web site. A working e-mail address must therefore be provided for the corresponding author. The proof can be downloaded as a PDF (portable document format) file from this site. Acrobat Reader will be required in order to read this file. This software can be downloaded (free of charge) from the following web site:http://www.adobe.com/products/acrobat/readstep2.html. This will enable the file to be opened, read on screen and printed out in order for any corrections to be added. Further instructions will be sent with the proof. Authors will be charged for any major changes against the manuscript, and excessive changes may be disallowed. If a significant amount of new material is added, the paper may be re-reviewed by the Editors and re-dated. Second proofs will be sent only if justifiably requested by the author. Final proofs are read by the Editorial Office and – only in problematic cases - by the Editors.

Author Material Archive Policy:

Unless specifically requested, CJMB will dispose of all electronic material submitted four months after publication. If you require return of any material submitted, please inform the Editorial Office of CJMB or Production Editor on submission.
